

I REMARKS

1.1 DISCUSSION ON AMENDMENTS TO THE SPECIFICATION

The amendments proposed herein have been entered in ancestor application Serial No. 08/034,627 and hence do not involve new issues or new matter.

The Examiner is requested to take notice that the instant continuation in part application has different page numbers than the page numbers in the '627 ancestor application. For convenience of cross referencing page numbers, the page numbers for the corresponding amendments made to the '627 ancestor application can be found in Exhibit-B.

1.2 DISCUSSION ON AMENDMENTS TO THE FIGURES

The Examiner is respectfully requested to enter the amendment to Fig 6AD set forth in Section 2.2 below. This amendment does not involve new issues or new matter.

This amendment has been entered in ancestor application Serial No. 08/034,627 and hence does not involve new issues or new matter. The effect of this amendment on the figures of ancestor application Serial No. 08/034,627 can be seen in the figures of ancestor Patent No. 5,584,032 (discussed above) which issued from the '627 application.

The drawing change involves only a "slight defect" and hence, in accordance with MPEP 608.02(v) and MPEP 608.02(w), the drawing changes are made without the need for a sketch.

In Fig 6AD, at the bottom right of the drawing, the pins on the right side of the U14B circuit have been numbered to be consistent with the pin numbering of corresponding circuit U18B in corresponding Fig. 6AF.

The Examiner is requested to take notice that the amendments to Figs. 6B.1 and 6B.2 add arrowheads to the ends of the signal lines which are separated when Fig. 6B was divided into Figs. 6B.1 and 6B.2. See Figs. 6B.1 and 6B.2 of ancestor patent No. 5,584,032 attached hereto in Exhibit-A.
